Proposal Form for Final Year Project – Batch 2020

Project Title	AR-Based Computer Fundamentals Course
Project Number	20
Internal Advisor Name	Mehjabeen Tahir
Group Member Roll No	2020S-CE-121, 2020S-CE-086, 2020S-CE-113, 2020S-CE-095
Group Leader Contact No	0331-3114993

1. **Project Description:** Our Project involves designing & development of AR-based Computer components & devices. Blender will be used to design and develop 3D models and Unity will be used to implement AR in the App. Using this App, students can view computer components from pdf slides using Android Phone in AR. This will enhance learning process by making it easier for students to remember electronic components more effectively.

2. Objectives/Functionalities of the Project:

S. No	Project Objective	Completion Dates
1.	Research on AR technology and decide features of our Project.	20-Feb-2023
2.	Buy, create/design and edit 3D Models.	15-May-2023
3.	Create Image targets and Vuforia DB for image targets & build prototype App (3-4 models).	20-July-2023
Mid-Year Evaluation		
4.	Implement AR on all 3D Models, and update CPF lectures with image targets.	15-Sept-2023
5.	Design UI for android App on Unity.	10-Nov-2023
6.	Add additional features in App (if required)	1-Jan-2024
7.	Test the App for bugs and Upload App on the Google Play Store.	10-Jan-2024

3. Methodology

	Software	Hardware
Programming Languages	C#	Android Smartphone
Operating Systems	Android, Windows	
Databases	Vuforia	
Others (Any cloud-based service, domain etc, ML.)	Unity, Blender	

4. List of Purchased and Designed Components:

Purchased Components	Designed Components
3D Models (https://www.cgtrader.com/3d-models)	3D Models
(https://sketchfab.com/store/3d-models)	App's User Interface (UI)
(https://www.turbosquid.com)	

5. **Project Related to SDGs:** SDG 4 (Quality Education), SDG 9 (Industry, Innovation, and Infrastructure)

6. **What will be the output of your final product:** An Interactive App which will help students to visualize computer components (devices & ports) in 3D using AR technology. This will increase students' motivation to learn more about computer components.
